- Knowledge of vulnerability scanning, penetration testing basics, and cybersecurity defense strategies.
- Skilled in identifying suspicious activities, malicious links, unsafe websites, and online scams.
- Strong analytical and problem-solving skills with a keen interest in cybersecurity and continuous learning.

PROJECT

E-commerce website

College project

- We developed an e-commerce website as a college project.

- The website starts with a login page, and after successful login, the user is redirected to the homepage. On the homepage, users can choose categories such as Female, Male, and Children.
- After selecting a category, they can browse products like clothes and accessories. Users can add their desired products to the cart and proceed to the payment section.
- The payment page provides multiple options such as Cash, UPI, and Net Banking. After completing the payment, the user receives a tracking ID and can view all order details successfully.
